About Company

Founded in 2014 in Gurugram, Haryana, Unique Power Control Pvt. Ltd. started its journey as an electrical supply, equipment trading, and industrial automation company. Since inception, we have built a strong reputation for excellence, reliability, and professionalism by consistently exceeding industry standards and delivering high-quality solutions.

Our Group of Companies

- **Unique Power Control Pvt. Ltd.**
Core Focus: Manufacturing & Industrial Solutions
- **AE Works**
Core Focus: Electrical Panels & Automation
- **Unique Ekotek india**
Core Focus: EMS, SCADA & Digital Automation

Our Core Expertise

- **SCADA Solutions**
- **Energy Monitoring System (EMS)**
- **Plating Plant Solutions**
- **Electrical Panels & Automation**
- **Power Quality Management**

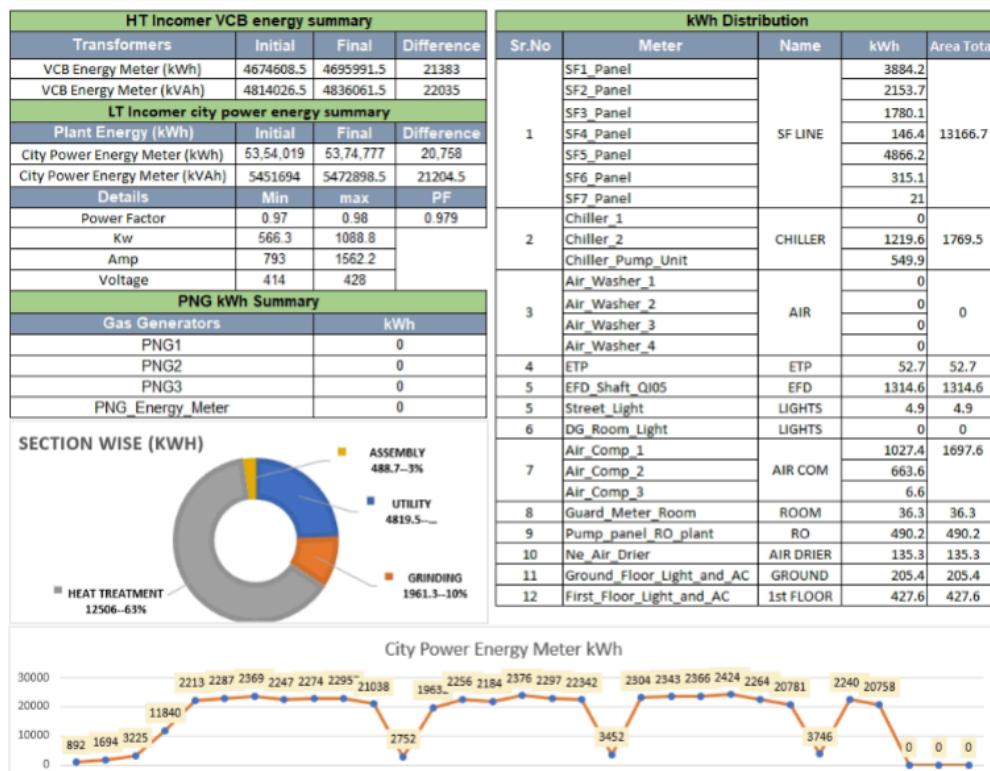

DASHBOARD

Real-Time Energy Visibility

Monitor energy usage across machines, departments, or entire plants in real time, helping identify inefficiencies and make data-driven decisions instantly.

REPORT

Telegram,SMS,MOBILE

We provides real-time energy monitoring, instant Telegram and SMS alerts, usage analysis, fault notifications, and smarter energy management to reduce waste and improve overall efficiency.

Automated Reporting & Analytics

Daily, weekly, and monthly energy reports with trend graphs and dashboards support energy audits, ISO standards, and management review processes.

Authorized channel partners for

KRYKARD ALM-36 Power Quality Analyzer

Advanced portable analyzer for monitoring voltage, current, harmonics, transients, and energy parameters, helping industries improve power quality, efficiency, and equipment reliability.

Key Points

- Measures voltage, current, and harmonics up to 50th order
- Captures sag, swell, transients, and inrush events
- Supports detailed energy & efficiency analysis
- Ideal for industrial audits & preventive maintenance

DASHBOARD

Centralized Plating Process Monitoring using power operation

Monitor live plating parameters—including rectifier output, tank temperature, dosing cycles, and production status — across all stations, enabling instant visibility, accurate control, and quick decisions to maintain plating quality and reduce process deviations.

If you'd like, I can prepare the full list of similar benefits for planting plants, like:

Our plating plant system generates automated batch, amp-hour, chemical, temperature, and alarm reports, providing full traceability, quality control, productivity insights, and data-driven decision support for efficient and consistent plating operations.

Note:- Integrating Telegram with SCADA enables instant alerts, remote monitoring, live status updates, quick fault notifications, and faster decision-making to improve safety, efficiency, and plant reliability.

Authorized channel partners for

PLC Panel

Industrial-grade PLC control panel designed for accurate automation, reliable performance, and safe operation across process, power, and manufacturing applications.

Our PLC control panels are designed for reliable industrial automation, offering precise control, safety interlocks, seamless communication, and real-time monitoring to ensure efficient machine operation, reduced downtime, and long-term performance stability.

LT Panel

Reliable LT Panels designed for safe power distribution, high efficiency, and long-term performance in industrial environments.

We manufacture high-quality LT Panels, including PCC, MCC, APFC, and distribution boards to ensure safe, efficient, and reliable power management for industries, commercial buildings, and infrastructure projects.

Control Panel

Smart and reliable control panels designed for precise machine automation, safety, and efficient industrial performance.

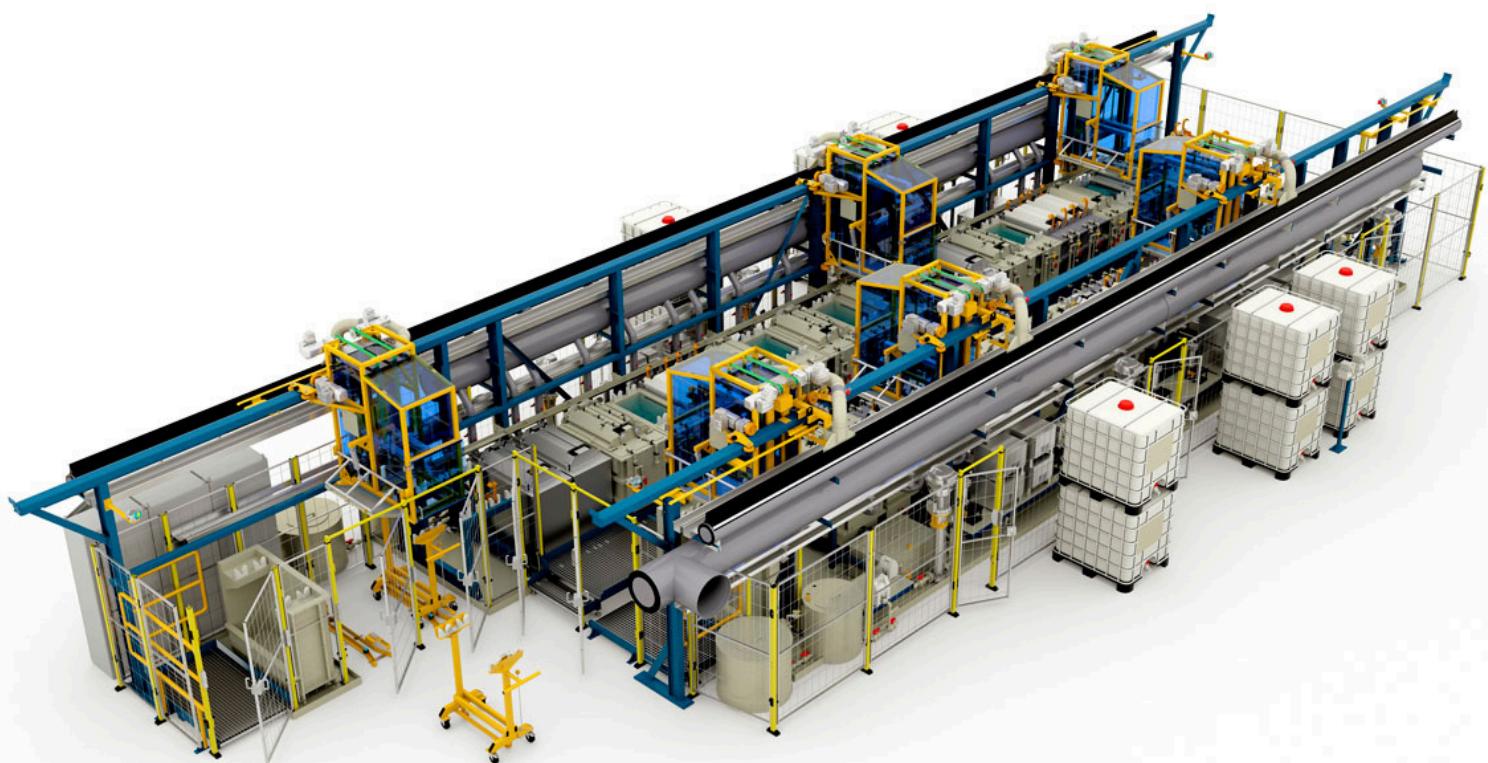

Authorized channel partners for

Plating Plant

We design and manufacture fully automated plating plants for high-precision, efficient, and consistent metal finishing operations.

Robust chemical-resistant plating systems with automation, energy monitoring, rectifier control, safety interlocks, and advanced process regulation—all designed for consistent coating quality and long-term reliability.

Components in Plating Plants we provide

- Chemical-resistant PP / PVC / HDPE tanks
- SCR / IGBT Rectifiers
- Industrial heaters & temperature controllers
- Filter pumps & solution circulation system
- Automatic dosing pumps & chemical sensors
- Overhead hoist/conveyor (for auto lines)
- PLC / HMI control panel
- Exhaust & fume extraction system
- Safety interlocks, level sensors & alarms
- Rinse tanks, dryer, and cooling system
- Energy & amp-hour monitoring system
